

SunTex - Heavy-duty shading fabric

Blocks up to 80 - 90% of the sun's hot rays

SunTex - is a fabric woven of extremely strong and durable vinyl-coated polyester yarns. The uniform weave design offers excellent outward visibility and good ventilation.

Shading is approximately 80 - 90 %, and SunTex is available in a choice of four earth tone colors. The fabric is also pet resistant making it ideal for use in doors and full-length screen panels.

The chart here shows a window with Brown SunTex installed. In midsummer as much as 230 BTUs can fall on each unprotected square foot of glass.

With SunTex installed, up to 80 - 90 % of the sun's heat and glare is reflected, absorbed and dissipated before it strikes the window.

- Extremely durable...also pet resistant
- Excellent outward visibility
- Protects against fading and sun rot
- Provides daytime privacy
- Lets in soft light and breezes
- Reduces glare
