

ALCOA VINYL

Alcoa is a well-known leading manufacturer of vinyl and aluminum siding. Vinyl siding is the home exterior treatment of choice for most homeowners. Nothing is as easy to care for as vinyl siding. It won't rot or mildew. The life of vinyl siding is twenty to twenty five years. It will never need painting during that time. Aside from a yearly cleaning with a pressure washer it's maintenance free.

Alcoa vinyl siding comes in a wide variety of styles. They have a Beaded Smooth siding, Dutch Lap, and Board & Batten. One of their most popular vinyl sidings is Cedarwood siding. It has a look of real wood, of course without the care. They have colors called Dreamcolor that can match any homes personality perfectly.

Along with vinyl siding products Alcoa offers soffits, fascia and trim, designer accents and shutters and rain and leaf removal. They have a wide range of door and window mantels and dentil moldings made out of a product called Cellwood. Cellwood products come with a limited lifetime warranty. So along with maintenance free siding you can be assured that your moldings and soffits will last a lifetime too.
