

The Delivery of Green Windows

Because of the incredible longevity of windows utilizing the Super Spacer® system it is probable that after installation you will never need new windows again. Longer lasting windows= fewer windows wasting away in landfills (because some people don't realize they can recycle windows!) NT Window is completely devoted to being an environmentally responsible company, reducing our carbon footprint in every way we find possible. Deliveries are carefully pre-planned in order to maximize cost and delivery efficiency. Our packaging is made of recycled products and our brochures and informational materials are made from FSC certified paper.

Super Star Windows are Recognized as Green Windows

NT Window is widely recognized as a company dedicated to green technology and innovation. NT Window is a proud member of the Green Business Bureau, a program developed to “address both the financial and environmental benefits of sustainability for SMBEs.” In 2009, after applying for two separate grants in our efforts to increase production efficiencies by using the principles of “lean manufacturing, NT Window was awarded a \$20,000 grant and a \$10,000 grant for Lean Practices. The grants were awarded by TMAC. Our windows with our high performance glass packages are ENERGY STAR qualified, and NT Window is a dedicated ENERGY STAR partner.

A Green Window is a Super Spacer Window!

Cutting-edge technology, a commitment to a comprehensively green business practice, and lean manufacturing practices make our windows which utilize Super Spacer some of the greenest windows on the market. While other window manufacturers might talk about “energy-efficient” windows, NT Window is proud to offer you our windows in the only color that really counts: GREEN.
