

Lower your utility bill by up to 20 percent.

TEXTILENE[®] Solar Screen

BRAND FABRIC

You can dramatically lower heat in your home or office building.

In fact, installing solar screens can slash your energy costs by up to 20 percent! Solar screens are perfect for windows, doors and skylights. They block 80% to 90% of the sun's harmful rays, reduce glare and provide daytime privacy.

Solar Screens never directly contact the surface of the glass, stopping heat before it reaches the glass. And Solar Screens not only reduce heat, they reduce glare and increase daytime privacy.

All Textilene[®] Solar Screen material is a woven, PVC coated polyester yarn that is formulated to withstand solar abuse!

Twitchell manufactures Textilene[®] 80 and 90 in a range of colors that will compliment the exterior appearance of your home or office building.

Our Solar Screen products include:

Textilene[®] 80

Blocks up to 80% of the sun's rays.

Textilene[®] 90

Blocks up to 80% of the sun's rays.

Textilene[®] 80 and 90 are available in a variety of colors:

- Beige
- Black
- Brown
- Grey
- Desert Sand (White/Tan Mix)
- Solid White
